BURKLE 
PROCESS TECHNOLOGIES

SUN IS RISING.

Multi-Functional Coating Technology for High Volume Production

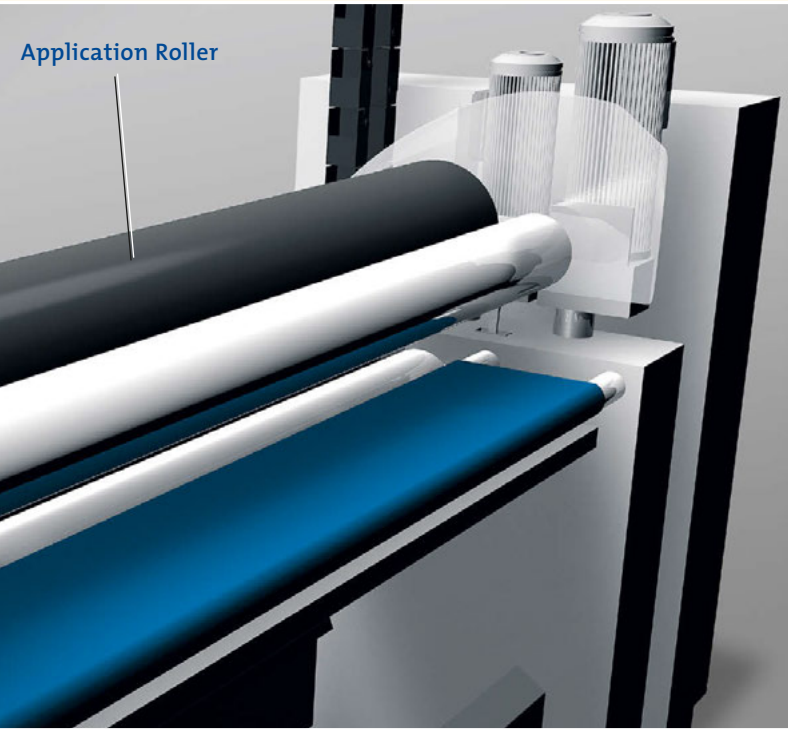

Advantages of Bürkle Single-sided or Double-sided Roller Coating

Single-sided or Double-sided Roller Coating

- Continuous horizontal coating
- Applicable for all liquids onto flat substrates
- Variable panel sizes and panel thickness
- Capability of coating flexible materials
- Also available in combination with subsequent flash off drying processes
- Loss free coating technique
- Uniform coating thickness

Application Roller
